VOL. XIX. NO. 39

GREENVILLE, KY., THURSDAY, NOVEMBER 8, 1917

50c. PER YEAR, IN ADVANCE

FARMERS MUST BE NATION'S HELPERS

SPIRIT OF ISRAEL PUTNAM IS
NEEDED IN ALL RURAL COM-
MUNITIES.

LIBERTY CALLED AND HE WENT

Same Spirit of Freedom is Calling to
American People Today—Are
You Responding Like a
Putnam?

The spirit which actuated Israel Putnam more than a century ago is what is needed in America today, according to men who are in close touch with the war conditions and the affairs of the United States.

Putnam was plowing his non-too-productive New England field when a horseman dashed up and told him the tale of the British raid on Lexington. It was seeding time and Putnam's field demanded immediate care.

Did he falter or hesitate? Did he procrastinate? No. He left his team in the field still hitched to the plow and hurried away to answer the call of his country. He did not stop to consider the cost of leaving. Liberty was at stake and he was off to the rescue.

Liberty is at stake again. Your liberty and the liberty of the rest of the civilized world. Every day the rural mail brings the story with all its dread warning along the winding country road to the Israel Putnams of today.

But they are not in the fields. They are storing their \$2 and \$3 wheat, their \$2 potatoes and their \$2 corn and their \$3 onions. They, better than anyone else, know how well they are responding to the call of liberty.

But it is time that these men, as well as their city brothers awake. Do your bit in placing the second issue of Uncle Sam's Liberty Bonds. Uncle Sam is your friend. But he can do only what you assist him accomplishing with all your might. Get busy, today. Be an Israel Putnam in your community.

ARKANSAS TENANT FARMERS TO BUY LIBERTY LOAN BONDS

Tenant farmers of Arkansas, who in previous years have found it difficult to make both ends meet, are this year going to be liberal buyers of Liberty Bonds," said H. A. Morrison, cashier of the Bank of Commerce, Earl, Crittenden County, Arkansas.

A ten-million dollar cotton crop in his county alone explains why this is to come about. Mr. Morrison said that his fellow citizens were showing such enthusiasm in the new bond issue that he came to St. Louis to arrange that in the fall it usually took about all the farmer got for his crop to pay his debts and get through the winter.

"This year it is different. The planters are going to get from 30 to 45 cents a pound for cotton, whereas before they only got from 6 to 10 cents."

"One fine thing about these bonds is that the farmer can use them as legal tender. In case they need money they will find their war bond investment readily negotiable."

Crittenden County's allotment is \$81,000, but Mr. Morrison is going to try to dispose of \$135,000 worth there.

JIM DALE

By Ellis Parker Butler.

Young Jimmy Dale, across our street,
Is a very saucy lad.

He grew so fast, the doctors said,
His heart was mighty bad;

They wouldn't let him do much work
Or any hearty play,

But, just the same, they drafted Jim.
And Jim has gone away,

Jim was a sort of great, big kid,
And fooling all the while;

So, when they ordered him to camp,
He went there with a smile.

Jim Dale is in the army now,
Lands legs, bum heart and all,

Lands feet, bum heart and all,
That's what the country's call.

God rest Jim's heart may drop him dead
Or he may live to be

Shot all to pieces 'over there'—

What odds to you or me?

By thunder! it's these odds to you!

If kids like Jim can go,
With smiler, to fight our wars for us.

We can put up the dough.

If we can buy a bond or two

And DON'T, while Jim, poor cosa,
Goes smilin' off to death or wounds.

Then hell's no good for us

Keg of Pennies

is Exchanged for
\$100 Loan in Bonds

Three years ago J. P. Whitesides, who sells newspapers at Edwardsville, Ill., decided he would save all the pennies he received. He accumulated a keg of the coins, which he kept in a cellar.

Last week he took the keg to a bank and exchanged the pennies for \$300 worth of Liberty Bonds.

DAILY DAIRY

HAY SUPPLY FOR DAIRY COWS

Roughages Are Relatively Cheaper
Than Grain, but Should Not Be
Fed Exclusively.

WORKERS VITALLY INTERESTED IN WAR

WAGE EARNER HAS MORE TO
LOSE THAN ANY CLASS
BY DEFEAT.

SLAVE OR FREEMAN, CHOOSE

Secretary Wilson Points That With
Democracy's Downfall Common
People Will Lose Hard Won,
Dearly Bought Liberties.

Because of the large hay crop and the small demand for it now, roughages should be fed to the limits of the dairy cow's capacity, says Prof. C. C. Hayden of the Ohio experiment station.

"Relatively, the roughages, like hay and corn stover, are much cheaper than grain, and hay is of unusually good quality. Roughage, of course, should not be fed exclusively, as such feeding might lead to compactation and death, even in dry cows and heifers. Some grain is needed in every dairy ration."

This dairy specialist also declares

"Choice alfalfa hay at \$20 a ton is cheaper than bran at \$30. Our experiments show that soy bean hay is in the same class as alfalfa, and clover is third. With corn at \$1 a bushel, clover should be worth about \$20 a ton, or \$5 more than it is now quoted."

Timothy hay is recommended for milking cows only in small quantities, to replace such grains as corn and hominy. Leguminous roughages have proved far superior in numerous experiments to timothy for cows in milk.

To the Wage-Workers of the United States:

The great European war in which we are now involved came to the people of the Western Hemisphere as a terrible shock, and to no portion of the people did it come as a greater shock than to the wage earners of the United States. They believed in and wanted international peace, but they wanted it on a basis of international justice which would insure the right of our people to govern themselves.

When the Imperial German Government undertook to destroy the lives of our people and to impose a rule of conduct upon us without our consent in places under the jurisdiction of the United States Government, there was no course left but to resist.

The workers have more at stake in this conflict than any others, because it is only in a democracy that the common people can come into their own. The great privilege is not given to all of us to serve our country on the battlefield or in the trenches, but there are other ways in which we can serve and assist those who are privileged to carry our flag on the battlefields of Europe. The impulse of sacrifice for the common good is sending the youth of our country into the trenches in defense of liberty, humanity and democracy.

To those of us who must of necessity remain at home to till the soil, harvest the crops, man the factories, mines and mills, the way is open for additional service. We, too, must make sacrifices. The men who go forth to do battle in the field must be equipped and sustained. Funds must be forthcoming to furnish the food, the firearms and other supplies for the fighting forces of the nation.

ANNOUNCEMENTS.

For Congress.
We are authorized to announce
that Mr. M. L. Roark, a candidate for Congress from the Third Congressional district, subject to the action of the Democratic primary to be held in August, 1918.

Our Country! In her intercourse with foreign nations may she always be in the right; but our country, right or wrong.
—Stephen Decatur.

Russia is still in the war. Too still in spots.

No country in the world now has a merely academic interest in the war.

People who expect to live in America after the war would do well to get in line with the loyal Americans.

Germany has a gift for finding the week spots in the armor of its adversaries—frequently because it has bribed some of the armorers.

We are in the war. We have lost soldiers and sailors killed, soldiers and sailors wounded, soldiers and sailors captured. And now we are in no mood to listen to gabby pacifists.

Pointed Paragraphs.

Real heroes act as their own press agents.

Some men's honesty is the result of lack of opportunity.

One of the first duties of a Christian is to learn to smile.

Usually a truly good woman has a sad look that is discouraging.

A missing suspender button often leaves a man in suspense.

Many a man gets gay when it isn't his turn to furnish the music.

Pessimists are seldom as tired of the world as the world is of them.

A woman with pretty teeth and good sense will laugh at a stupid joke.

Most amateur photographers prove conclusively, that truth is stranger than fiction.

This world is full of foolish people who are unable to see things from our point of view.

When a man first makes a fool of himself he gets an awful jolt—but he soon gets over it.

In after years a spinster may have cause to congratulate herself on the number of times she didn't get married.

Why He's Embarrassed.

I used to have, in other times, a roll of greenbacks handy; I always could dip up the dimes to buy the kids some candy. And when my wife reared up and cried, "I have to have a bonnet," I stripped an X off, and replied, "Go blow yourself, doggone it." But now I never have a plunk for anything we're needing; my money goes for costly junk to keep my auto speedin'. But yesterday I soaked the lyre that I solong have hammered, that I might buy a rubber tire for which the off-wheel clamped. We're out of flour, we're out of coal my wife is in a panic, because she sees me use my roll to pay a bum mechanic. I need a haircut and a shave, I need a shirt and collar, but how the dickens can I save when spark plugs cost a dollar? The kids have reached an ev'ly pass, they need new shoes and raimen; alas, the man who sells me gas demands an early payment. My auto takes my every rel, and chugs with friendish laughter; I'll keep me broke till I am dead, and forty years thereafter. And when I quit life's griefs and pains, I can't afford a casket, they'll have to rake up my remains and paint me in a basket.

WALT MASON.

Acidity of The Stomach

This affection, called also acid dyspepsia, is of common occurrence. It is caused by the presence of an excessive amount of hydrochloric acid in the gastric juice. That acid is a constituent of the normal gastric juice, but when it is present in excess amount it interferes with the digestion and causes much distress or even actual pain. Young adults suffer more frequently than older persons, but there are many victims of the disease among persons from forty to fifty years of age.

The symptoms are somewhat as follows, although, of course, they vary in severity and in character in different cases: The patient's appetite is good and he eats with relish, but at a variable period after the meal—generally from half an hour to an hour—he experiences a feeling of fullness and discomfort in the stomach. Gradually the discomfort becomes more pronounced and merges into a burning sensation—heartburn; there is a feeling of constriction in the throat, a hot gas escapes from the stomach, and the patient often raises a small amount of acid fluid that burns the throat—water brash. In very severe cases he vomits an acrid, sour material that may even be streaked with blood. There may or may not be actual pain in addition to the intense discomfort that has been described.

Acidity of the stomach may arise from a great variety of causes. It may accompany actual inflammation of the stomach,—acute or chronic gastritis, especially the latter—but in that case it is only one among a number of symptoms, and seldom the most prominent. It is also commonly present in cases of ulcer of the stomach, but in that condition the pain is more intense and there is also likely to be considerable blood in the vomited matter.

Usually acid dyspepsia is one of the so-called neuroses—associated with no actual change, either inflammatory or ulcerative, in the stomach so far as the usual methods of examination enable physicians to discover. It occurs for the most part in those who eat too hastily, who eat at irregular hours, or who eat too little at one meal and too much at another, or who carry the trials and worries of the day with them to the table. Highly nervous persons often suffer, and so do the hypochondriacal, who are constantly watching for symptoms—a quest that is generally successful.

The treatment of acid dyspepsia, which is based so largely upon its causes, will be considered in a future article.

Some people always get the best, others get what's left, and others get left. Select your Victrola now, at Roark's, and have delivery whenever you wish.

Man past 30 with horse and buggy to sell Stock Condition Powder in Muhlenberg County. Salary \$90 per month Address 9 Industrial Bldg. Indianapolis, Indiana.

Elections, war, high prices, hard winter, coal shortage, food saving, troop movements, food conservation, Red Cross and a multitude of other matters are tensely engaging all our people, these day, but in and through it all there is a strain of Christmas planning, for this is a fixed festival which will endure.

One of the vital points of vantage in the Victrola is that it requires less than half the weight to hold the needle in the groove than in any other machine. This accounts for the absence of surface noise in the Victrola. There are many other exclusive, superior advantages, which Roark will be glad to demonstrate and explain.

Price is always the least consideration, so do not sacrifice dollars in service-value for dimes in purchase price, when you buy a talking machine. Even in mechanical construction, the Victrola is worth the extra price; in artistic delivery, it distances all others. See and hear, for yourself, at Roark's.

There are millions of happy Victrola families throughout the world, more than 150 in Muhlenberg. Now would be a fine time for you to join the charmed throng, and have delights for Christmas, and next year, and all festivals and years to come. Anyway, see the instruments and enjoy a demonstration at Roark's.

GIVE TO Y.M.C.A. WAR FUND

Patriotism For To-Day

Those who go into the horrors of war to maintain with valor the honor of our country and presence the liberty of the world shall never find the glory that is theirs dimmed or clouded by any lack of our appreciation. But, there are millions of us who cannot go. Upon us rests the duty of sustaining them. And, of a sudden, business has become a duty. The money the very life of these boys in the trenches depends on must, in the last analysis, come from American business. It must be big and prosperous. The niggard today is the slacker. The man who fails in his utmost duty as a buyer, a maker or a seller, is by just that much reducing the efficiency of the man in the trench. The press and the people must insist upon such volume of buying and selling as we never saw before, if the enormous sums that are needed shall be forthcoming. Good business is good patriotism.

WILLIAM ELLIS.

Aids For County Teachers.

We have some material which we

shall be glad to give to the teachers of the county, and ask them to call or send for it. Several have already

been provided, and there is still a

supply adequate for many more.

THE J. L. ROARK ESTATE

(Orien L. Roark, Manager)

Greenville, Kentucky

The U. S. Government has issued a bulletin on the destructiveness of rats and mice, and places the loss to the country from them at a million dollars a day. The people of the nation are urged to make incessant war on these rodents, and especially as food supplies are very high, now, and every grain needed.

Get Victor tung-tone needles

from Roark. Laboratory tests ex-

tending over a year have demon-

strated that two-thirds the wear is

eliminated by use of these needles,

and the Victor Talking Machine Co.

recommends the exclusive use of this needle.

Plays perfectly, and from

100 to 300 records without change.

Help raise the \$35,000,000 which

this country will place in the hands

of the Y. M. C. A. War Work

Council, to help our soldiers and

sailors in this country and on foreign fields. The apportionment for

Muhlenberg is \$2,175, which is less

than \$1 each for the men and boys

who will likely be in the service.

Ford Car for Sale.

Another absolutely new 1917 5

passenger Ford Car. The only new

Ford ready for immediate delivery

in western Kentucky. If interested

write or call phone 242. Price \$450.

T. A. Isaacs

A few of our merchants are on the

"spot cash" basis, and others are

considering going to this plan with

the beginning of the year. All of

them will have to get closer on credits,

if they want to stay in business,

for affairs in the commercial world

are getting tight.

Victrolas are used in the

public schools in 6200 cities, towns

and villages of this country, from

446 in New York City down to one

in many small places, and beside

these are other thousands in the

rural public schools, denominational

parochial, private schools, and con-

servatories.

Any other talking machine may be

had aplenty, at any season, but Vict

rolas, made in many times greater

quantities than any of them, has

never reached the point where all

demands are met, and at this season

the shortage is very sharp, all over

the world. "There is a reason,"

which Roark can demonstrate to the

delight of anyone.

All for only \$2.25.

Local Mention.

It was a clean sweep.

Election weather was fair, anyway.

Now is the Indian summer of our content.

Less than seven weeks to Christmas.

Pay taxes this month, or with penalties next.

Have you won or lost, on the election?

Large stock of mirrors at Roark's. Small prices.

All the county officers will soon be Republican.

This touch of weather makes a soldier need a sweater.

Furnished room for rent. Apply to Mrs. A. M. Bohannon.

Less than a month now until Congress will be in regular session.

Mr. Robt. Hardison was here from Lewisburg the first of the week.

Mrs. Cecil E. Roark was home from Central City for the week-end.

Mr. Elliot James was here from Paducah this week, on business affairs.

You are in to win if you get a Victrola. Let Roark tell and show you how and why.

Lieut. Duncan Hamilton was here from Camp Zachary Taylor for the weekend.

Give David Fleming your order if you want first class tailor work, pressing or altering.

A whole lot of good, hard work counted for naught, when the returns came in.

Letters should be more appreciated now, since they cost three cents for postage.

Mr. William Wickliffe was home from Camp Taylor a few days the first of the week.

The Victrola has many exclusive, supreme features, which Roark will gladly demonstrate to you.

Our Indian summer this year has had a right smart touch of winter mixed in it.

Good morning! Do you get to pay the government any excess profit tax? Neither do we.

A Complaint Which Is a Compliment.

The firm which has the contract for the removal of garbage at Camp Zachary Taylor has made complaint that on account of the extreme limited amount of food available, it will be compelled to throw up the contract. The contracting concern had prepared to feed a lot of hogs from the supplies obtained at the Camp, and evidently thought they had a fat contract. The announcement of disappointment is one of the best bits of news which has come from the nation-wide effort to save food. With 38,000,000 men in war, most of whom would be glad to get the scraps from the food which our boys are now getting in American cantonments, it shows that the military powers are aiding the civilian effort and sacrifice being made. We had better begin to save at the very beginning, and thus avoid dire want at the end.

Mr. D. J. Duncan was here from Bowling Green during the week, mingling with relatives and friends and transacting some business.

Mr. J. Leo Fentress is being congratulated on the issue of his paper, The Argus, last week, which was enlarged, enlivened and extra interesting.

There is a scarcity of pennies all over the country. Brought about, we suppose, by giving change for a \$5 bill when a rash person buys a pound of steak.

Mr. Buren Martin, who has been spending a month here with home folks and friends, left the latter part of the week for Albuquerque, N. M., where he is fast regaining his health.

Weather Forecast for Week.

Forecast For the week Beginning Sunday Nov. 4, 1917—For Ohio Valley and Tennessee: Fair with somewhat higher temperatures early days.

"Over the Top" and away in front, the Victrola, with its many exclusive, patented features, leads the world in numbers and absolute supremacy of each instrument. Call at Roark's and see and hear why.

Everybody should give to the Y. M. C. A. War Work fund, as this is one of the very best means of winning the war, by keeping our boys comfortable, interested, clean, strong and patriotic.

Our Advertising is not to sell goods, but to enable people to intelligently and economically buy goods. It is impossible for us to get any benefit from it unless we have helped the customer. The J. L. Roark Estate.

A man who has been through a series of meatless, wheatless, sweetless days, says that he supposes the next thing will be eadless days, and they are the ones when he will stay away from home.

Right in your home you can have the greatest concert in the world, for on your Victrola you can command greatest artists, from Abbott to Zimbalist, to sing, play or speak for you. Call at Roark's and arrange for one of these instruments.

Notice to the Public.

I hereby notify the public that W. D. Blackwell is no longer connected in any capacity with the Union Central Life Insurance Co., of Cincinnati, Ohio.

I. L. Rousseau, General Agent.

Lyon & Healy and Washburn pianos are tuned to international pitch, and they have every other superior quality which has gained the international place of honor which they have attained. See, try and hear them at Roark's.

Several folks are glad the election is over, for during the past many weeks there have been many folks who promised to do numerous things "after the election," so if they keep their word, and do not wait until too long after that event, our business people will have some needed funds.

Mr. A. E. McCracken has recovered from an attack of malarial fever, and is out again.

A world of music for an atom of price is what every possessor of a Victrola gets. Suitable, appealing substantial gifts for weddings, anniversaries, holidays can be had at Roark's.

REPUBLICANS WIN.

Entire County Ticket Elect- ed by Large Majorities.

Muhlenberg's election passed off without any unpleasant incidents on Tuesday, with a large vote cast, something over 5200 male votes being cast, while more than a thousand women entered the polls. There was great activity displayed by both political parties in getting out the vote, and dozens of automobiles in all parts of the county were in service from early until late. The Republican ticket was elected by large and varying majorities, as follows:

Representative, A. J. McCandless, 785.

County Judge, J. Ed. Shaver, 672.

County Attorney, T. J. Sparks, 686.

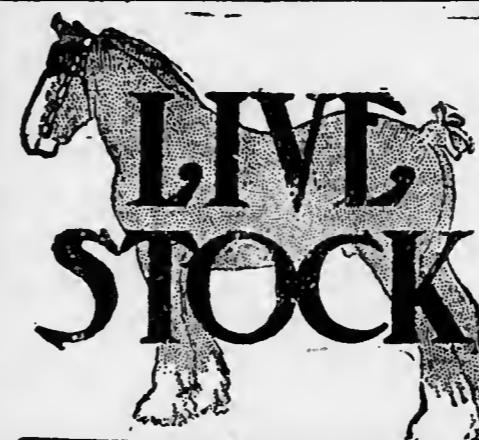

County Court Clerk, I. P. Sumner, 729.

Sheriff, Arthur Lile, 643.

Jailer, S. P. Miller, 814.

School Superintendent, V. M. Moseley, 872.

If an animal's food supply is insufficient for normal growth, the animal may be retarded in growth. If this

STEER RETARDED IN GROWTH

Stunting an Animal as Result of In-
sufficient Food May Be Only
Temporary Condition.

Live stock products are the result of growth. By far the largest part of increase in animals is the result of growth. The younger the animals the greater the growth impulse. Many factors influence the tendency of an animal to grow. Among these are age, condition, gestation, lactation and the quantity and quality of food. A given amount of food will produce more growth on a young animal than on the same animal at later age. All the growth factors influence the young animal much more powerfully than older animals.

If an animal's food supply is insufficient for normal growth, the animal may be retarded in growth. If this

treatment is continued for a long time the animal may become permanently stunted.

Stunting an animal as the result of insufficient food may be only a temporary condition. An animal does not lose its capacity to grow as the result of stunting. F. B. Mumford, dean of the Missouri College of Agriculture, cites a feeding test at the Missouri experiment station in which an animal that had been stunted by poor feeding to such an extent that it weighed only 200 pounds at twelve months of age, gained 84 pounds during the second year. Only 5.6 pounds of grain for each pound of gain made were required for this steer stunted during the first twelve months. A steer that had been generously fed during the first twelve months of his life gained only 50 pounds during the second twelve months, and this gain was more expensive than the gain made on the stunted steer. The amount of grain required to make a pound of gain on the well-fed steer was 0.9 pounds.

It is certain that stunting an animal even for so long a period as twelve months does not destroy its capacity to grow.

Well-Fed Hereford.

treatment is continued for a long time the animal may become permanently stunted.

GAINS MADE FEEDING LAMBS

Result of Test at South Dakota Station to Determine Value of Alfalfa and Prairie Hay.

The best gains ever secured at the South Dakota experiment station in feeding lambs was in an experiment to determine the comparative value of alfalfa and prairie hay with the same kind of a grain ration.

The grain ration consisted of a mixture of 100 pounds of oats, 100 pounds of shelled corn and 25 pounds of oil meal.

Each lot was started on one pound per head of the mixture daily, and increased until they were receiving two and one-half pounds per head of grain daily, and what hay they would eat.

The average daily gain per head for the lot that received the alfalfa hay was .51 of a pound, while with the lot that received the prairie hay, the average daily gain per head was .38 of a pound.

Horticultural News

LOCATION OF BUDS

Apple and pear—Terminally on spurs. One and two-year-old wood. Occasionally either terminally or laterally on one-year-old wood—not on spurs.

Peach—Laterally on one-year-old wood—either singly or in clusters of three. When in clusters the central bud is a wood bud.

Apricot—Mostly laterally on spurs from one-year-old wood.

Plum—Laterally on one-year-old wood on spurs.

Cherry—Laterally on one-year-old wood and in clusters on very short spurs.

HINTS FOR PLANTING TREES

Apples Require Much Space, While Peaches and Plums Will Do With Less—Use Good Soil.

Don't try to economize on space, unless it is absolutely necessary. Apple trees need plenty of room—10 feet each way is none too much—although it is possible to get good results much closer by pruning and fertilizing. Peaches and plums do well 20 feet apart, but 24 feet is better.

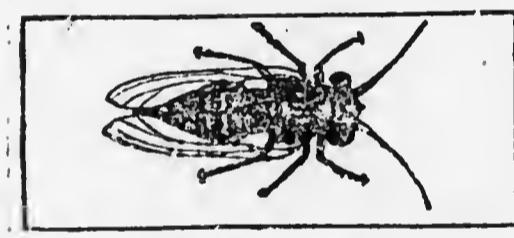

Trees should always be planted in good soil. If your soil is shallow dig a hole at least six inches deeper than the lowest roots of your young tree—a foot is better—and fill it in with good dirt, even if you have to haul it from a distance in a wagon. Make the hole twice the diameter of the spread of the roots. This means a lot of work, but it will pay.

Loosen the subsoil in the bottom of the hole, the deeper the better, but loosen it a few inches, anyway, and set the tree just the same depth it formerly stood. An inch or two deeper will do no harm, but don't get it too deep or it will smother. Sift the good top soil around the roots and don't start to tramp it until the roots are covered. If tramped before they are covered, the dirt protects them. Leave the dirt loose on top, although packed beneath. Either slope it toward the trunk or leave it level. Don't heap it up around the base of the tree. This sheds water and may cause the roots to get too dry.

SPRAYING FOR PEAR PSYLLA

Just Before Blossom Buds Open at End in Spring Spray With Lime-Sulphur Solution.

Insectine and soap are the best materials to use for controlling pear psylla. Use one pint insectine and four pounds soap to 100 gallons of water. The soap helps to make it stick. Spray in November or December after a spell of cold weather, on a day when the

Pear Psylla.

temperature is rising and is about 40 degrees or more. You will then kill many of the psylla which winter in the mature stage.

In spring just before the blossom buds open at the end spray with winter strength lime-sulphur, 1 to 8. By that time the eggs are deposited and are very susceptible to injury. Two applications a year made in this way will hold the psylla in check.

FORMULA FOR GRAFTING WAX

Nothing Better Than Combination of Resin, Beeswax and Tallow—Roll It Into Sticks.

There is nothing better than the old and well-known formula of four pounds resin, two pounds beeswax and one pound tallow for grafting wax. Shave the beeswax into thin slices and pulverize the resin so that the materials will melt entirely when subjected to heat. As soon as the materials are melted, pour the liquid into cold water, then pat and work it like molten candy, rolling it into sticks 1½ inches in diameter and 4 inches long. When properly made, the wax has a good service, is tough and of a light yellowish-white color.

TO CONTROL SCALE INSECTS

Lime-Sulphur Spray, With Soluble Oils, Is Effective When Properly Applied, Says Ohio.

Spraying fruit trees with lime-sulphur wash and soluble oils controlled San Jose scale when sprays applied, while powdered sulphur compositions gave promising results in experimental tests conducted by entomologists of the Ohio Experiment station. Gaseous oils were unsuccessful.

A little difference in effectiveness was noted between some-boiled lime-sulphur and the commercial form mixed with seven parts of water and applied in early spring. Soluble oils, mixed with 15 parts of water, are also recommended.

Roark's, Greenville, Ky.

FARM STOCK

PLACE FOR FARROWING SOWS

That Animal May Not Be Disturbed She Should Be Kept Separated From Other Swine.

The less a sow is disturbed at farrowing time the better, and for this reason she should be kept separate from the other swine. While someone should be on hand, unless she needs assistance, it is best to keep away from her. If it does become necessary to help, do it as quietly as possible. As the pigs are not able to take much milk, the sow should not be stimulated for a few days. Give the sow plenty of water, as she is in feverish condition, but take the chill off of it if the day is cold.

It is not necessary to feed the sow for a day or two, and the first feed given should consist of a small amount of thin slop, which should be gradually increased as the pigs become able to take more milk. In two weeks' time she should be on full feed, which should consist of a good laxative, milk-producing ration. There is no better way of feeding the pigs than through the mother, so feed the sow for the greatest amount of milk.

Allowing the sow to stay with the ewes through the winter and spring until lambing or shearing time is not always the best practice. It's good for the ram in case the ewes are well fed; he will get the lion's share, occupying the space for three ewes at the trough and rack, and grow fat and abusive. He will choose to eat where the ewes have peacefully lined themselves up rather than take an open place where feed is untouched, writes R. A. Hayne in National Stockman and Farmer. He stalks about and hems the ewes out of his way on all occasions.

His Rough Treatment of Ewes Is Source of Great Loss to Farmer—Keep Him Separated.
